

# SOLAR ASSET MANAGEMENT

## End-to-End Lifecycle Protection for Your Solar Assets

As solar portfolios scale, most performance losses don't come from major failures – they come from tracker misalignment, aging hardware, and hidden communication faults. Polar Racking Solar Asset Management is built to close that gap.

## Reduce Downtime and Maintenance Costs, and Increase Energy Yield

### What's Covered

- Tracker mechanical systems
- Motors and driveline components
- Sensors and weather inputs
- Tracker control systems
- System alignment and calibration
- Preventative maintenance
- Support from the manufacturer

### Value to You

- Provides documented system inspections
- Helps owners maintain tracker performance
- Ensures manufacturer oversight after commissioning

### Why Developers Choose Solar Asset Management

- Field-Based Support
- Remote Monitoring Support
- Engineering and Boots-on-the-Ground Expertise

## Polar's Solar Asset Management Program

Manufacturer-backed protection designed specifically for Polar racking systems.
